

# Neurodivergent is Normal!

**Hi!**

**Welcome to my  
coloring book!**

**This book was made  
to help you understand  
neurodivergent kids.**

**You might have a  
neurodivergent friend, sibling  
or classmate.**

**Hopefully, this book will  
help you understand them better.**

**I hope you have fun coloring!**

**-Susanna**

Some kids have a hard time paying attention with noise in the background, so they might wear noise cancelling headphones or listen to music.

**Sometimes neurodivergent kids have difficulty speaking, so they might use a talking device. This may look like an iPad and is used to communicate.**

**Some kids may leave class early to go to therapy. Speaking to a therapist can help give them tools to succeed in school.**

School can be a very stressful place for neurodivergent kids. Sometimes they may use fidgets to concentrate, or carry around a stuffed animal.

Neurodivergent kids are still just as hardworking and smart as neurotypical kids. They often just need accommodations in order to work to the ability they're capable of.

**Neurodivergent kids are just like you, and may have a lot of the same interests as you.**

**Everyone is different, and one kid might need something another one doesn't. It's important to be accepting of everyone.**

**No one is the same, and the most  
important thing is to be kind.**
